# YILDIZ UMBRELLA *share solutions* FROM NATURE

## *Models*

It presents different alternatives with various designs as Fiber star, Mini star, Mega star, Telescopic and Sunflower for your shadow solutions. Sunflower models can be adjusted to any angle in accordance with the changing location of sun. Mini star and Mega star models can be ordered with optional coffee table, ashtray or towel rack apparatus. All models colored in white as a standard can be manufactured in any RAL colors. Yildiz Umbrellas which you can order as square and octagon forms and 2-3-4-5 and 6 meters of diameters are used at pool sides, cafes, wharfs, beaches and any open space. You can obtain samples of Yildiz Umbrella from the company representative and try them at your place for choosing the best shadow system for you.

## *Umbrella Sunshade Canvas*

The sunshade canvases of Yildiz Umbrellas are chosen from special cotton canvas fabrics which are treated against ultraviolet beams, mildew and decomposition and meticulously sewn in its own factory. The sunshade canvases manufactured by using waterproof polyester fabrics are used in rainy weathers and the firm logo can be applied to the canvas optionally.

Wind circulation is ensured for all Yildiz Umbrellas by 8 ventilation holes on the canvas and number of ventilation holes can be increased for preventing falling at open spaces with high wind density. Ventilations act as a chimney and ensure circulation of cigarette smoke.

Yildiz Umbrellas are delivered with their waterproof protection covers.

## *Assembly Systems*

Yildiz Umbrellas which are manufactured with 2 different bases as the Steel and Plastic Bases can also be ordered without any base. Falling by wind or light stormy weathers is prevented by pouring concrete inside these bases. All bases are equipped with wheels and pulled anyway by side levers. Optional brake systems are applied for preventing movement of the base in blustery weather conditions. By means of housing under bases, they can be stored up to 5 units on top of another and space can be saved. It is possible to ensure fixed use by using wharf or sand layered galvanized stainless apparatus.

## *Accessories*

**Coffee Table** - the coffee tables which can be mounted to the main body of the umbrellas are located between two loungers. They can be used as cocktail tables by adjusting to the required height.

**Ashtray Set** - the ashtray set designed for putting out cigarettes and junking is assembled to the coffee table and it can be moved to left and right. Optionally, it can be mounted 2 sets and used as a flowerpot and an esthetic look is ensured.

**Hanger** - the apparatus designed for hanging bags, cameras or towels is manufactured by using high-density petkim products.

## *Guarantee - Technical Service*

The fabrics, assembly systems and accessories of Yildiz umbrellas are guaranteed for 2 years and 5-star service is provided. Each replacement part of Yildiz Umbrellas are manufactured meticulously in our factory for maintaining long-lasting life and no replacement part shortage is experienced.

Technical service support is provided to you on-site where you will use Yildiz Umbrellas and you save time.

## YILDIZ UMBREALLA - A Family Company

YILDIZ ŞEMSIYE, founded by Ayhan Kış in 1995, new designs to attract the attention of the world umbrella sector in the pride of being the foremost name in the industry continues to travel.

The paragraph starting with the broad technical staff will change as follows; The large technical staff, the business of the younger generation and Adana factory to a closed area nearly 10.000 m2 and newly established. A new excitement by opening the Antalya factory with 5000 m2 closed area. The stars in the Umbrella are inevitable rise, quality, design and most importantly customer satisfaction he owes his debt. Our company; 22 years of experience and Bodrum, Antalya, K.K.T.C. Girne showrooms and customers faster sales and service.

Ayhan Kış  
the chairman

The only way to become successful is to meet the expectations and demands of your customers.

- innovative
- flexible
- high-quality

### Design

Fiber star which is designed on corrosion and falling of easily wearing umbrellas used at pool sides and beaches which are hard to move solves all these problems with its quality, price and esthetic.

### High-quality engineering

It is consisted of a  $\text{Ø}32 \times 2$  mm aluminum middle pipe. All bearer and support points are plastic and guaranteed Petkim products are used. The wind circulation is provided by 8 ventilation points on the canvas. Sunshade canvas can be ordered with polyester or jute.

Trendy Side Beach

### *fiberstar base*

It is manufactured under high pressure and temperature by using the high-density products of Petkim that are 5 mm thick. Corrosion is completely prevented because it is plastic, falling and flying against wind and light storms is prevented by pouring concrete inside the base which weighs 28 kg.

### *opening and closing fiberstar*

It is easily opened by pushing the spring mechanism on the middle pipe and lifting the middle node upwards and closed easily by lowering the node.

### *ventilation of fiberstar*

The wind circulation is provided by 8 ventilation points on the polyester canvas. Wind is discharged through jute canvas in case of complete jute canvas option.

### *fiberstar arms*

All bearer and support points are plastic and guaranteed Petkim products are used. Corrosion and fractures are prevented by using fiber for the arms.

### Design

Mini star with standard hanger apparatus and optional coffee table and ashtray accessories brings an esthetic solution for pool sides and beaches with its canvas without skirting. It can be moved any place by its wheeled base and it is prevented against falling by its base weight.

### High-quality engineering

It is consisted of 8 branches in 18x12x2 mm dimensions and  $\text{Ø} 40 \times 2,3$  mm aluminum central pipe that are electrostatic oven-dyed. The wind circulation is provided by 8 ventilation points on the canvas. Polyester or jute sunshade canvas can be ordered with standard special cotton fabrics.

### *mini star plastic base*

It is manufactured under high-pressure and temperature by using the high-density products of Petkim that are 5 mm thick. Corrosion is completely prevented because it is plastic. Falling and flying of the umbrella against wind is prevented by pouring concrete inside the base pedestal which weighs 42 kg.

Q: 50 cm H1 : 13 cm

### *mini star hanger*

The apparatus designed for hanging bags, cameras or towels is manufactured by using high-density petkim products.

Q: 7 cm H: 2 cm

### *mini star plastic coffee table*

Manufactured by using Q: 45 cm high-density Petkim products. It runs as the same as with the umbrella opening mechanism. Can be moveble up and down on the pipe.

Q: 45 cm H: 5 cm

### *mini star ashtray*

It is manufactured under high-pressure and temperature by using the high-density products of Petkim that are 5 mm thick. Corrosion is completely prevented because it is plastic. Cigarette extinguisher can be added.

Q: 16 cm H: 10 cm

### *stainless ashtray apparatus*

08 mm thick stainless chrome sheet has been cut and drilled with holes. It is easy to use and prevents flammable materials from being thrown into the trash can.

Q: 15 cm H: 1 mm

## Design

Mega star which is designed to be used at pool sides, beaches and cafes at windy spaces is unique with its moving base pedestals calculated carefully against falling and interior pipes used for reinforcing the body.

## High-quality engineering

It is consisted of 8 branches in 30x18x2,2 mm dimensions and  $\text{Ø } 50 \times 2.5$  mm aluminum central pipe that are electrostatic oven-dyed. A steel pipe of 46x3 mm is placed inside that central pipe as a support. The wind circulation is provided by 8 ventilation points on the canvas. Polyester or jute sunshade canvas can be ordered with standard special cotton fabrics

*telescopic square galvanized cover*

It's manufactured by 1mm thick galvanized plate in square form. It's life is extended by covering by dust paint under 200 C in an electrostatic oven. It can be paint requested real color .

83 cm x 83 cm H1: 15 cm

*telescopic marble base*

It is established by putting 4 pieces, 52 kg plastic blocks full of concrete, totally weigh 210 kg ,on 3 mm thick square galvanized frame. It moves by wheels integrated by 6 steel gaskets. Each marble can be carried easily by a lifting arm.

80 cm x 80 cm H1: 15 cm

*telescopic turning lever*

Opening system of the telescopic umbrella is established by turning the worm screw inside the middle pipe towards clockwise by means of the galvanized lever with a plastic endpoint.

*telescopic tower and height detail*

The tower added on the umbrella acts as a chimney and provides wind circulation. Tower height is 40 cm.

### Design

Sunflower designed by inspiring the love of sunflower for the sun allows adjusting the shade's location in accordance with the angle of sunlight changing during the day.

### High-quality engineering

It is consisted of 30x18x2.2 mm 8 electrostatic oven-dyed branches and 47x87x3 mm aluminum bearing profile. All bearer and support points are aluminum cast and plastic and guaranteed Petkim products are used. Side hinged sunshade system creates larger shades for open spaces such as cafes, restaurants and etc. because no middle pipe is used. The wind circulation is provided by 8 ventilation points on the canvas. Polyester, american fiver, imported acrylic or jute sunshade canvas can be ordered with standard special cotton fabrics.
